Notes on forward-looking statements

This report may contain forward-looking statements concerning the ETF, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2023, the NBI Liquid Alternatives ETF's units returned 0.05% compared to 2.14% for the ETF's benchmark, the FTSE Canada T Bill 91 Days Index. Unlike the benchmark, the ETF's performance is calculated after fees and expenses. Please see the *Past Performance* section for the ETF's returns, which may vary mainly because of fees and expenses.

The Fund's net asset value rose by 21.77% over the period, from \$332.15 million as at December 31, 2022 to \$404.46 million as at June 30, 2023.

The increase stemmed mainly from unit purchases by investors in the Fund.

After an especially challenging 2022 for investors, the first half of 2023 turned out to be quite positive, with the vast majority of stock and bond market segments posting gains as at June 30, 2023. Indeed, despite a few jolts caused by the failure of certain US regional banks, the combination of slowing inflation and the resilience of the US economy was enough to inspire optimism in the markets.

Bonds delivered positive performances over the period, albeit more modest than those of equities. Specifically, the Canadian benchmark index rose by 2.5% (FTSE Canada Universe), outperformed by US high-yield credit (+5.4% BofA High Yield) and long-term bonds (+4.7% FTSE Canada Long).

The majority of commodities declined during the first half of 2023, illustrating deflationary pressures against a background of restrictive monetary policies. Nevertheless, the price of gold managed to record gains (+5.5% in US\$), supported by an increasingly tense geopolitical context and a marginally weaker US dollar (-0.6% for the DXY index). Meanwhile, the Canadian dollar appreciated by 2.4% against the greenback, benefiting notably from the Bank of Canada's preference for additional interest rate hikes.

Under these circumstances, the Fund underperformed its benchmark.

In the first semester of 2023, NALT underperformed in absolute terms. During this period, its three biggest return contributors were Gold, Copper and Soybean Oil futures positions and its three biggest return detractors were Gasoline, Corn and WTI Crude futures positions.

In the first quarter of 2023, NALT overperformed in absolute terms. During this period, its three biggest return contributors were Gold, Natural Gas and Silver futures positions and its three biggest return detractors were the Australian Dollar, WTI Crude and Gasoline futures positions.

In the second quarter of 2023, NALT underperformed in absolute terms. During this period, its three biggest return contributors were Copper, Soybean Oil and Heating Oil futures positions and its three biggest return detractors were Gasoline, Corn and WTI Crude futures positions.

Recent Developments

Effective April 1, 2023, NALT's benchmark was changed to the FTSE Canada 91-Day T-Bill Index. This has no impact whatsoever on the Fund's performance in absolute terms.

Effective May 24, 2023, NALT substituted in its investment universe the 90-Day Eurodollar futures to the Three-Month SOFR futures, as the former was to be discontinued. This has only but a marginal impact on the strategy and the fund's performance, as the two futures were closely related in terms of properties and behaviour.

As of 2023-06-30, the fund had short positions in Fixed Income, short positions in Currencies (except for the British Pound), short positions in Energy (except for Natural Gas), long positions in Agriculture (except for Soybean Meal), and long positions in Metals.

As the current economic climate remains highly uncertain, the manager continues to anticipate significant market volatility. In the best-case scenario, a better balance in the labour market would lead to a deceleration in wage growth and core inflation, thus opening the door to less restrictive monetary policies. Yet, while not impossible, this scenario seems unlikely at this stage, as the cautionary signals continue to mount.

As such, although the manager still expects a sustained decline in inflation and an imminent pause in interest rate hikes, the combination of restrictive monetary policies, a vulnerable job market, and weak corporate earnings prospects calls for a more defensive investment strategy. What's more, several early signs of an economic slowdown are pointing towards the second half of the year, when the impact of previous rate hikes should become more tangible.

That being said, it is important to recall that NALT's underlying models are purely quantitative. These models try to capture market trends to favourably direct weekly allocations. It is thus hard to predict the ETF's strategy for the coming months, except for the punctual and infrequent discretionary decisions. The strategy is strictly bound to respect diverse constraints nonetheless, which keep it in line with NALT's three main objectives: a sustained absolute positive performance, a moderate volatility, and decorrelation to equity markets.

On April 1, 2023, the benchmark was modified to better reflect the categories of assets in which the Fund invests. The previous benchmark was the Morningstar® Broad Hedge Fund Index.

Effective May 1, 2023, the distribution frequency of the ETF was revised from yearly to quarterly.

On May 1, 2023, the ETF's independent review committee (the "IRC") was increased to four members when Stéphanie Raymond-Bougie was appointed as an IRC member.

Related Party Transactions

National Bank Investments Inc. (the "manager") is the manager and promoter of the ETF. Accordingly, it is entitled to receive, in exchange for the services that it provides to the ETF, management fees paid to it by the ETF (see "Management Fees" below).

From time to time, the manager may, on behalf of the ETF, carry out transactions or sign agreements to involve certain persons or companies related to it, to the extent that these transactions or agreements are, in its opinion, in the interest of the ETF. The description of the transactions or agreements between the ETF and a related party is provided in this section.

Members of the manager's group may earn fees or spreads in connection with services provided to, or transactions with, the NBI ETF, including in connection with brokerage and derivatives transactions.

Trustee

The manager has retained the services of Natcan Trust Company to serve as trustee for the ETF and has retained the services of National Bank Trust to serve as portfolio manager.

Designated Broker

The manager has signed an agreement with National Bank Financial Inc. ("NBF"), a company affiliated with NBI, under which NBF will serve as a designated broker for the ETF. The designated broker agreement signed with NBF is in keeping with market conditions.

Brokerage Fees

The ETF may pay broker's commissions at market rates to a corporation affiliated with National Bank Investments Inc. The brokerage fees paid by the ETF for the period are as follows:

	Period ended June 30, 2023
Total brokerage fees	239,800.65

Management Fees

The management fee is payable to the ETF manager in consideration of the services that the manager provides to the ETF in its capacity as manager, such as managing the day-to-day business and affairs of the ETF.

The ETF pays an annual management fee of 0.60% to the ETF manager for its management services. The fees are calculated based on a percentage of the ETF's daily net asset value before applicable taxes and are paid on a monthly basis. The management fees primarily covers investment management and general administration services.

Past Performance

The performance of the ETF, presented below and calculated as at December 31 of each year, is based on the net asset value of the ETF. It assumes that all distributions made in the periods shown were reinvested in additional units of the ETF. These returns do not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of an ETF does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The bar chart indicates the performance of the ETF for each of the years shown and illustrates how the performance has changed from year to year. It shows, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the ETF) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

⁽¹⁾ This information is derived from the ETF's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for ETF pricing purposes. The differences are explained in the notes to the financial statements.

⁽²⁾ The net assets are calculated in accordance with IFRS.

⁽³⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

⁽⁴⁾ Distributions were paid in cash or reinvested in additional units of the ETF, or both.

⁽⁵⁾ This information is provided as at the last day of the accounting period shown.

⁽⁶⁾ Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.

⁽⁷⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

⁽⁸⁾ The ETF's portfolio turnover rate indicates how actively the ETF portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher an ETF's portfolio turnover rate in an accounting period, the greater the trading costs payable by the ETF in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of an ETF.

⁽⁹⁾ Closing market price on the last trading day of the year as reported on the TSX.
