Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2023, NBI U.S. High Conviction Equity Private Portfolio's Advisor-2 Series units returned 10.98% compared to 14.16% for the Fund's benchmark, the S&P 500 Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value rose by 7.80% over the period, from \$2.896 billion as at December 31, 2022 to \$3.122 billion as at June 30, 2023.

The new year got off to a roaring start on rising hopes for a soft landing for developed economies as inflationary pressures showed continued signs of abating, while China's reopening also fueled investor optimism at the beginning of the year. A wave of risk aversion then swept up the financial markets in February. Hopes for an imminent end to rate hikes and a dovish policy pivot were dashed in the wake of unrelenting signs of resilient growth, an overheated labour market, sticky inflation, and some hawkish central bank rhetoric that prompted a shift in investor expectations towards higher interest rates for longer and quashed the optimism that spurred the powerful market rally at the beginning of 2023. However, financial markets ended a tumultuous first quarter on an upbeat note amid growing speculation that policymakers may have to abandon their tightening plans in response to turmoil in the banking sector. Moreover, the prompt and forceful actions taken by the authorities to limit the damage calmed investor concerns of more widespread contagion across the banking sector and added to investor optimism.

The second quarter got off to a solid start, with both stock and bond markets generating positive results in April. Investors welcomed the strong start to the corporate earnings season, where better-than-expected results have helped to overshadow concerns stemming from persistent inflation, the prospect for further rate hikes, and lingering fears of an economic downturn. Sentiment deteriorated and financial markets relapsed in May on the back of a hawkish re-pricing of central bank policy expectations, a sluggish global growth landscape, and debt ceiling jitters in the United States. However, after weeks of negotiations, a deal was reached to suspend the debt ceiling and averted a US default. Still, focus swiftly reverted to the precarious environment of persistent inflation and looming recession risks. Financial markets fluctuated at the end of the second quarter as investors contemplated the environment of resilient growth, persistent inflation, and the trajectory for monetary policy. Global equity markets extended their 2023 gains in June amid mounting speculation that central banks will relent on the fight against inflation and engineer a soft economic landing.

The S&P 500 experienced significant gains and ended the first six months of the year. The Information Technology and Telecommunication Services sectors were the top two performers while the Utilities and Energy sectors were the two bottom performing sectors over the period.

Over the period the Fund underperformed its benchmark. Relative underperformance was mainly driven by stock selection in the Consumer Discretionary and Information Technology sectors. Partially offsetting these negatives was security selection in the Financials and Industrials Sectors as well as lack of exposure to the Energy sector.

Among the top contributors to the performance were Microsoft and Alphabet. Conversely, among the bottom detractors were UnitedHealth Group and AutoZone.

Recent Developments

During the period, the portfolio manager did not exit or initiate any new positions in the fund. He did, however, trim positions in Alphabet and Microsoft while adding to UnitedHealth, CME Group and FactSet Research Systems.

The portfolio manager's investment horizon is best measured in years, conceivably decades, not months or quarters. His focus continues to be on identifying what he believes to be high quality companies with sustainable competitive advantages, operating in industries with high barriers to entry, contributing to durable pricing power.

Effective on or about March 10, 2023, the Advisor Series of the Fund was renamed Advisor-2 Series, the Series F of the Fund was renamed Series F-2, the Series FH of the Fund was renamed Series FH-2 and the Series H of the Fund was renamed Series H-2.

Beginning on or about April 10, 2023, PineStone Asset Management Inc. jointly acts as portfolio sub-advisor alongside Fiera Capital Corporation for the Fund.

On May 1, 2023, the Fund's independent review committee (the "IRC") was increased to four members when Stéphanie Raymond-Bougie was appointed as IRC member.

The Advisor Series, Series F, Series FH, Series H and Series O were launched for the Fund on May 29, 2023.

The Advisor-2 Series, Series F-2, Series FH-2, Series F5, Series H-2 and Series T5 of the Fund were soft capped on or around May 31, 2023. This means that these series are closed to new investments, except for purchases in existing accounts by unitholders as of the soft capping date, and those with active pre-established systematic investment and distribution reinvestment plans.

Past Performance

The performance of each series of the Fund is presented below and calculated as at December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

Annual Returns

The bar charts indicate the performance for each the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

- ⁽¹⁾ This information is derived from the Fund's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.
- ⁽²⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.
- ⁽³⁾ Distributions were paid in cash or reinvested in additional units of the Fund, or both.
- ⁽⁴⁾ The net assets are calculated in accordance with IFRS.
- ⁽⁵⁾ This information is provided as at the last day of the accounting period shown.
- ⁽⁶⁾ Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.
- ⁽⁷⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.
- ⁽⁸⁾ The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
