

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2023

Meritage Income Portfolio
Meritage Growth Plus Income Portfolio

Notes on forward-looking statements

This report may contain forward-looking statements concerning the Portfolio, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions “foresee”, “intend”, “anticipate”, “estimate”, “assume”, “believe” and “expect” and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

This interim management report of fund performance contains financial highlights, but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-866-603-3601, by writing to us at investments@nbc.ca, by visiting our website at www.nbinvestments.ca, by visiting SEDAR’s website at www.sedar.com, or by contacting your advisor. You may also contact us using one of these methods to request a copy of the Portfolio’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2023, the Meritage Growth Plus Income Portfolio's Advisor Series units returned 3.77% compared to 6.57% for the Portfolio's blended benchmark. The broad-based index, the Morningstar Canada Large-Mid Index (CAD), returned 6.00%. Unlike the indices, the Portfolio's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Portfolio's series, which may vary mainly because of fees and expenses.

The Portfolio's net asset value dropped by 1.20% over the period, from \$76.50 million as at December 31, 2022 to \$75.58 million as at June 30, 2023.

A relative calm settled over the markets in the second quarter of 2023, offering investors some respite after a prolonged period of elevated volatility. Indeed, despite a few jolts caused by the failure of certain U.S. regional banks, the combination of slowing inflation and the resilience of the U.S. economy was enough to inspire optimism in the markets. Apart from the strong performance of the U.S. equity market and especially its technology giants, the main asset classes ended the period little changed, with bonds slightly underperforming equities.

On the economic front, data continues to send out often contradictory signals, underlining the uniqueness of the current cycle. Specifically, the weakness of indicators linked to the manufacturing sector and the significant contraction in the price of several commodities point to a deterioration in economic activity. However, the service sector remains resilient thanks to relatively upbeat consumers, which are supported by excess savings and a strong labour market. The end result is an economy that, for the time being, continues to show weak but positive growth, putting off fears of recession until later.

Abroad, the EAFE developed countries also performed well, buoyed by an economic situation in Europe that proved less dire than expected, as well as renewed enthusiasm for Japanese equities. Although lower, the Canadian stock market also posted gains that were slightly higher than those of emerging markets, a region undermined by a lacklustre economic recovery in China.

Finally, the majority of commodities declined during the first half of 2023, illustrating deflationary pressures against a background of restrictive monetary policies. Nevertheless, the price of gold managed to record gains, supported by an increasingly tense geopolitical context and a marginally weaker U.S. dollar. Meanwhile, the Canadian dollar appreciated against the greenback, benefitting notably from the Bank of Canada's preference for additional interest rate hikes.

However, the flip side of a stronger-than-expected economy is the recent persistence of inflation, much to the dismay of central banks. The Bank of Canada is a case in point; after announcing a pause in its monetary tightening cycle in January, it finally decided to raise its policy rate again in June, taking the markets by surprise. Meanwhile, even though the Federal Reserve took a break in June, it hinted that there could still be two more rate hikes this year, starting with the July meeting. Clearly, the prospects of rate cuts before the end of the year seem increasingly unlikely, as the return to more accommodative policies will have to wait.

Given this context, the Meritage Growth Plus Income Portfolio was beaten by its blended benchmark over the period. The Capital Group Global Equity Fund, and the BMO Dividend Fund both brought value to the Portfolio during the period. The funds that make up the Canadian bonds of the Portfolio, namely the RP Strategic Income Plus Fund, and the Manulife Strategic Income Fund were nearly neutral toward the Portfolio's overall return during the period.

Recent Developments

As the current economic climate remains highly uncertain, the manager continues to anticipate significant market volatility. In the best-case scenario, a better balance in the labour market would lead to a deceleration in wage growth and core inflation, thus opening the door to less restrictive monetary policies. Yet, while not impossible, this scenario seems unlikely at this stage, as the cautionary signals continue to mount.

As such, although the manager still expects a sustained decline in inflation and an imminent pause in interest rate hikes, the combination of restrictive monetary policies, a vulnerable job market, and weak corporate earnings prospects calls for a more defensive investment strategy. What's more, several early signs of an economic slowdown are pointing towards the second half of the year, when the impact of previous rate hikes should become more tangible.

Against this background, the manager maintains a defensive asset allocation. In terms of geographic allocation, the emerging markets economic backdrop looks ever more challenging, and which is more exposed to rising geopolitical tensions between the West and China.

On May 1, 2023, the Fund's independent review committee (the "IRC") was increased to four members when Stéphanie Raymond-Bougie was appointed as IRC member.

Related Party Transactions

National Bank of Canada ("the Bank") and its affiliated companies' roles and responsibilities related to the Portfolio are as follows:

Trustee, Custodian and Registrar

Natcan Trust Company ("NTC"), a direct or indirect wholly-owned subsidiary of the Bank, is the Portfolio's trustee. In this capacity, it is the legal owner of the Portfolio's investments.

NTC also acts as the Portfolio's custodian, registrar and transfer agent. The Manager pays NTC for its services as custodian based on the assets held by the Portfolio. In addition, a flat fee per transaction is paid to NTC. With respect to the registrar and transfer agent services for the Portfolio, a fixed annual amount is paid to NTC by the Manager.

Agent for securities lending transactions

NTC acts as the agent for securities lending transactions acts on behalf of the Portfolio in administering securities lending transactions entered into by the Portfolio. NTC is an affiliate of the Manager.

Manager

As described in the *Management Fees* section, the Portfolio pays annual management fees to National Bank Investments Inc. (the "Manager") in consideration for management services. The management fees cover mainly the Manager's costs of managing the Portfolio's investments. The Manager is an indirect wholly-owned subsidiary of National Bank of Canada (the "Bank").

Since October 29, 2013, the Manager pays the operating expenses of the Portfolio other than its "portfolio costs" (defined below) (the "variable operating expenses"), in exchange for the Portfolio's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Portfolio.

The administration fees are equal to a specified percentage of the net asset value of each series of the Portfolio, calculated and paid in the same manner as the Portfolio's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, fund facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Portfolio shall also pay certain portfolio costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Meritage Portfolios.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Portfolio costs.

Portfolio Manager

The Manager has appointed National Bank Trust Inc. ("NBT"), an indirect wholly-owned subsidiary of the Bank, as the portfolio manager for the Portfolio. A flat fee is payable annually to NBT for its management services.

Distribution and Dealer Compensation

Portfolio securities are offered by National Bank Direct Brokerage (a division of National Bank Financial Inc., an indirect wholly owned subsidiary of the Bank), CABN Investments (a division of National Bank Investments Inc.), National Bank Financial Inc. and other affiliated entities. Each month, brokers receive a commission representing a percentage of the average daily value of the securities held by their clients. In addition, when Advisor Series securities are purchased, brokers usually receive a commission, which varies depending on the sales charge option chosen at the time of investment.

Holdings

As at June 30, 2023, National Bank Investments Inc. held 232.29 Portfolio securities for a value of \$2,083.60, which represented close to than 0.0018% of the net asset value of the Portfolio at that date. Transactions between National Bank Investments Inc. and the Portfolio were carried out in the normal course of business and at the Portfolio's net asset value as at the transaction date.

Administrative and Operating Services

NBT provides the Portfolio with certain services, including accounting, reporting and portfolio valuation services. The costs incurred for these services are paid by the Manager to NBT.

Management Fees

The Portfolio pays annual management fees to the Manager in consideration for management, portfolio advisory and administrative services and facilities required by the Portfolio in its day-to-day operations. As the Portfolio invests in underlying funds, the fees and expenses payable in connection with the management of the underlying funds are in addition to those payable by the Portfolio. However, the Manager makes sure that the Portfolio does not pay any management (or operating) fees that, to a reasonable person, would duplicate a fee payable by the underlying fund for the same service.

The management fees are calculated as a fixed percentage of the Portfolio's daily net asset value, are accrued on a daily basis and are paid monthly. The Portfolio is required to pay applicable taxes on the management fees.

Under the heading *Distribution*, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the heading *Other*, the fees relate mainly to investment management, investment advisory services, general administration and profit. The breakdown of the main services received in consideration for the management fees, as a percentage of the management fees collected from the Portfolio, is as follows:

Series	Management Fees	Distribution	Others [†]
Advisor Series*			
Front-end load**	1.95%	51.28%	48.72%
Back-end load - 1 to 6 years	1.95%	25.64%	74.36%
Low load - 1 to 3 years	1.95%	25.64%	74.36%
Low load - 4 years and more	1.95%	51.28%	48.72%
Series F	0.95%	—	100.00%
Series O	N/A***	—	100.00%

^(†) Includes all costs related to management, investment advisory services, general administration and profit.

^(*) Excluding sales commissions paid on the Advisor Series with the low sales charge option and deferred sales charge option, which are not included in the management fees.

^(**) Rate applicable for all investments, including Advisor Series existing before May 14, 2015, systematic investment programs, reinvested distributions and switches.

^(***) There are no management fees paid by the portfolio with respect to the Series O. Instead, Series O securityholders pay a negotiated administration fee directly to National Bank Investments.

Past Performance

The performance of each series of the Portfolio presented below is calculated as of December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of the Portfolio does not necessarily indicate how it will perform in the future.

Annual Returns

The bar charts indicate the performance for each the Portfolio's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

Series 0

⁽¹⁾ Returns for the period of October 31, 2013 (commencement of operations) to December 31, 2013.

⁽²⁾ Returns for the period from January 1, 2023 to June 30, 2023.

Financial Highlights

The following tables show selected key financial information about the Portfolio and are intended to help you understand the Portfolio's financial performance for the accounting periods shown.

⁽⁴⁾ This information is derived from the Portfolio's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

⁽²⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

⁽³⁾ Distributions were paid in cash or reinvested in additional units of the Portfolio, or both.

⁽⁴⁾ The net assets are calculated in accordance with IFRS.

⁽⁵⁾ This information is provided as at the last day of the accounting period shown.

⁽⁶⁾ Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.

⁽⁷⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

⁽⁸⁾ The portfolio's turnover rate indicates how actively the Portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Portfolio buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a portfolio's turnover rate in an accounting period, the greater the trading costs payable by the Portfolio in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Portfolio.
