

# ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended December 31, 2023

Global Equity Fund

## **NBI Sustainable Global Equity Fund**

### **Notes on forward-looking statements**

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-888-270-3941 or 514-871-2082, by writing to us at National Bank Investments Advisory Service, 500, Place d'Armes, 12th floor, Montreal, Quebec, H2Y 2W3, by visiting our website at [www.nbinvestments.ca](http://www.nbinvestments.ca), by visiting SEDAR+'s website at [www.sedarplus.ca](http://www.sedarplus.ca), or by contacting your advisor. You may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## Management Discussion of Fund Performance

### Investment Objective and Strategies

The NBI Sustainable Global Equity Fund's investment objective is to provide long-term capital growth while following a sustainable approach to investing. To do this, it invests, directly or indirectly through investments in securities of other mutual funds, in a portfolio comprised primarily of equity securities of companies located around the world.

The portfolio sub-advisor employs a combination of a "top-down" and "bottom-up" investment process with the goal of identifying, based on its internal research and analysis, securities of companies worldwide that fit into sustainable investment themes. The investment team utilizes top-down research based on the UN Sustainable Development Goals to gain a deeper understanding of long-term secular themes, which can drive the market outlook for industries. The investment team then uses a bottom-up analysis of individual companies, focusing on prospective earnings growth, valuation, and quality of company management and on evaluating a company's exposure to ESG factors.

### Risks

The global investment risk of the Fund remains as described in the simplified prospectus or any amendments thereto and Fund Facts.

### Results of Operations

For the twelve-month period ended December 31, 2023, the NBI Sustainable Global Equity Fund's Advisor Series units returned 11.56% compared to 20.47% for the Fund's benchmark, the MSCI World Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value rose by 48.21% over the period, from \$156.62 million as at December 31, 2022 to \$232.12 million as at December 31, 2023.

The increase stemmed mainly from investments in the Fund by other NBI Funds and market fluctuations.

Recession fears dominated the early part of 2023 as the Fed continued its steady path of rate increases. Instead, the economy proved resilient and surpassed bearish expectations. Fears of recession have been replaced by hope for "immaculate disinflation," where inflation slows without a meaningful impact on growth and employment.

While narrow, the market's rally was fuelled by a surprisingly strong economy, artificial intelligence (AI) ambitions of Big Tech, and lately, the prospect of interest-rate cuts in 2024. Even the bond market has perked up after a historic downturn, one that briefly sent yields to 5%.

For 2023, global equity markets as measured by the MSCI ACWI increased by 13.8% in CAD.

In this context, the Fund underperformed its benchmark.

2023 was all about the "magnificent 7" which saw large multiple expansion. The nature of this strategy has historically led us to be underweight to this cohort of companies (by over 15% relative to the MSCI ACWI), which resulted in over 580 bps of underperformance. Looking at relative performance against the rest of the index, the portfolio outperformed by around 60 bps. With that said, the positive impact from our winners including Topbuild, Adobe, and Partners Group was offset by weakness in our healthcare exposures (e.g., names like Biorad and Becton Dickinson where we have continued to see inventory digestion), renewables (NextEra Energy and Orsted impacted by cost inflation and rising interest rates) as well as networking equipment (Calix). The fund also suffered from exposure to SVB early in the year.

### Recent Developments

#### Key buys

Q4 – Initiated Veralto and Nvidia and concentrated in high conviction names: Aptiv, NextEra Energy and Visa.

Q3 – Took advantages of the market volatility in Aug/Sept. to initiate in resilient business models: WSP Global, Fair Isaac, RELX, Labcorp, NextEra Energy, and Neste and topped up BYD, Bentley Systems, Keysight Tech, UNH, AIA, Calix, Experian.

Q2 – Little activity. Initiated in Bentley Systems

Q1 – Some offence with new positions in Palo Alto and AMD, adds in Adobe, TSMC, Intuit, and defensive exposures through names like J&J, Experian

#### Key sells

Q4 – Exited AMD and CHR Hansen

Q3 – Exited Lumentum, Abcam, Xylem and Orsted. Reduced Deere on cyclical concerns and more profit taking on YTD winners (Adobe, Flex, Onsemi, NXP, West Pharma).

Q2 – Little activity. Some profit taking on AI winners and exited DSM.

Q1 – Exited SVB, Dell, Nextera Energy, and Dassault Systems.

The strong rally in the indices in 2023 has masked more muted returns for most stocks. The ten largest stocks in the benchmark (largely big technology-oriented companies) accounted for an abnormally large share of the benchmark's weight and returns YTD. The equal weighed MSCI ACWI underperformed by over 1300 basis points.

While some of this is justified by the superior profitability of these mega cap tech stocks and the new growth avenues that AI has provided to some of them, this narrowness will likely end in due course, as it has in the past. Catalysts for a change in leadership are often difficult to predict, but a few logical reasons include: a) recovery in growth from sectors such as healthcare and communications that have been plagued with excess inventories, b) a recognition that the generative AI wave will benefit more than just the cloud providers as related earnings materialize, c) weaker results and/or multiple compression from historically elevated levels in one of the individual market leaders that lead investors to question the whole group.

From a timing perspective, many of our themes have been overlooked this year given the dominance of "the magnificent 7." Incredible benchmark concentration reinforces our view that benchmarks are inherently backward looking. In 2023, this concentration has had a negative impact on our relative performance, but we believe that over the long-term our disciplined process will help us to uncover more attractive investment opportunities for investors. Our portfolios remain highly differentiated as compared to the benchmark with many of the megacap names absent from our holdings. Indeed, what we hold has performed well vs. the rest of the market, arguing that the underlying fundamentals of the majority of our holdings remain strong.

Many of our portfolio's companies have seen their prices reset even as earnings expectations for the portfolio as a whole have continued to grow nicely, in line with our expectations. While valuation at the index level has risen dramatically, it's distorted by a few key stocks. By contrast, our portfolio trades at very reasonable valuations and the premium vs. the market is at one of the lowest levels in the past decade.

Amidst all the noise, our themes continue to move forward as broad shifts in the global economy run their course. Global challenges such as access to healthcare and infrastructure needs are not solved overnight. Entering the year with a more defensive mindset did not help. However, our core thematic exposures continue to offer robust growth potential.

We believe a portfolio with high-quality companies on the right side of change, trading at reasonable valuations, provides a strong combination for the current market environment. Resilient fundamentals and narrow leadership in the market has created a powerful setup for a group of companies that fit this profile.

Within our Information, Communication and Technologies (ICT) theme, the latest earnings results from a number of leaders like Nvidia, AMD and the cloud providers demonstrate that society's move towards intelligent digital economies is leading to increased demand for bigger networks, more powerful and energy efficient data centres and new consumption models. We continue to expect the key AI enablers, i.e., the companies that facilitate the training and running of AI models in an energy-efficient way, along with the adopters (those who successfully integrate AI in their applications) will enjoy strong tailwinds near-term.

Within our Transportation theme, secular shifts in autos continue: EV sales rose >50% in 2023 (through Sept.) vs. 63% growth in 2022 globally, per Canalys. Adoption continues to grow but it will not be a straight line and auto OEMs are in a discovery phase, learning what features have the greatest appeal with consumers. As with our other themes, our focus on the enablers of vehicle electrification is driving an earnings tailwind despite OEM-specific challenges. Every EV rolling off the line contains significantly more electronic content (2x in an EV vs. ICE and 1.5x for a hybrid) benefitting suppliers in this ecosystem. We're also seeing a standardization of charging standards in the US, which should encourage further adoption.

In our health-related theme, there have been a few dynamics at play in 2023. A lot of the diagnostic and testing companies benefitted from robust demand during the early days of COVID. Lead time to get products went up a lot, so customers ordered a lot to ensure supply. In 2023, we saw the other side of this as lead times came down. We are going through a period of inventory digestion (for life sciences and diagnostic tools particularly) along with macro weakness in China, a double whammy of sorts for suppliers into this ecosystem. The underlying growth rate of their customers (biopharma production) remains double digits. The market enthusiasm around weight loss has also drawn investor attention, and buying activity, further depressing valuations for companies outside this group. 2024 should see an improvement in inventory profiles and growth rates for suppliers of medical innovation products as well.

As Ben Graham said: "In the short run, the market is a voting machine but in the long run it is a weighing machine." Rather than chasing the market's chosen few, our focus continues to be on identifying powerful themes and the companies best positioned to capitalize on these opportunities. This approach has delivered strong results for our clients over time and we're highly confident in its ability to do so in the future.

We recently engaged with Haleon to gain insight into the company's position on various ESG issues.

We met with the British multinational consumer healthcare company's Head of Sustainability, Teri Lyng, a biochemist and scientist, formerly holding various positions at GSK. Her group is charged with driving sustainability goals across categories and countries and consists of people recruited from Unilever and other competitors, along with former GSK employees with supply chain specialties. Haleon also has an Environmental and Social Sustainability Committee on the board, chaired by Marie-Anne Aymerich.

As a new company, Haleon has yet to launch its first sustainability report, it has started to disclose more metrics, data and information on its website. The company just released its first set of full-year results, and admitted delivering a high-quality sustainability report shortly after would have been too big of an undertaking.

The company is working to bolster its data and establish a master data set to get baseline numbers. It also takes a different approach on Scope3 emissions where the number does not include consumer use; instead, the company has identified the top 20 materials having the biggest impact on purchased goods and will use this as a roadmap for further Scope3 reductions.

Haleon is also focused on health inclusivity, with programs aimed to empower 59million people per year to make better health decisions. The AB investment team provided the company with different ways to measure the impact of its programs, along with centralizing it all in one place.

On DEI issues, median gender pay gap is at 5.3%, well below the industry average at 15%. The company also employs more than 24,000 people globally. We are impressed that Haleon is committed to following the UN Guiding Principles on Business and Human Rights (UNGPs), the Organization for Economic Co-Operation and Development's (OECD) Guidelines for Multinational Enterprises and obligations imposed by the Modern Slavery Act2015 in the UK and Modern Slavery Act2018 in Australia. Haleon is also committed to upholding the Universal Declaration of Human Rights and the core labour standards set out by the International Labor Organization.

A key focus of our ESG approach is investing in companies whose products and services contribute to the achievement of the UN Sustainable Development Goals (UN SDGs). To be eligible for investment, our companies must obtain a minimum of 20% of their revenues from these SDG aligned product and services. As of December 31, 2023, the Sustainable Global Thematic portfolio had 85.0% weighted SDG revenues exposure.

On May 1, 2023, the Fund's independent review committee (the "IRC") was increased to four members when Stéphanie Raymond-Bougie was appointed as an IRC member.

The Private Series was launched for the Fund on November 28, 2023. This Series is offered by way of private placement.

## Related Party Transactions

National Bank of Canada ("the Bank") and its affiliated companies' roles and responsibilities related to the Fund are as follows:

### Trustee, Custodian, and Registrar

Natcan Trust Company ("NTC"), a direct or indirect wholly-owned subsidiary of the Bank, is the Fund's trustee. In this capacity, it is the legal owner of the Fund's investments.

NTC acts as registrar for the Fund's securities and the names of securityholders. NTC also acts as the Fund's custodian. The fees for NTC's custodial services are based on the standard rates in effect at NTC.

### Agent for securities lending transactions

NTC acts as the agent for securities lending transactions acts on behalf of the Fund in administering securities lending transactions entered into by the Fund. NTC is an affiliate of the Manager.

## Fund Manager

The Fund is managed by National Bank Investments Inc. (“NBII”), which is a wholly-owned subsidiary of the Bank. Therefore, NBII provides or ensures the provision of all general management and administrative services required by the Fund’s current operations, including investment consulting, the arrangement of brokerage contracts for the purchase and sale of the investment portfolio, bookkeeping and other administrative services required by the Fund.

The Manager pays the operating expenses of the Fund other than its “Fund costs” (defined below) (the “variable operating expenses”), in exchange for the Fund’s payment to the Manager of annual fixed-rate administration fees with respect to each series of the Fund.

The administration fees are equal to a specified percentage of the net asset value of each series of the Fund, calculated and paid in the same manner as the Fund’s management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, Fund Facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Fund shall also pay certain Fund costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Fund.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series’ management fees, administration fees or Fund costs.

As described under the heading *Management Fees*, the Fund pays annual management fees to NBII as consideration for its services.

## Portfolio Manager

The Manager has appointed National Bank Trust Inc. (“NBT”), an indirect wholly-owned subsidiary of the Bank, as the portfolio manager for the Fund. A flat fee is payable annually to NBT for its management services.

## Distribution and Dealer Compensation

NBII acts as principal distributor for the Fund. In this capacity, NBII buys, sells and swaps securities through external registered representatives. Fund securities are also offered by National Bank Financial Inc. (including its division National Bank Direct Brokerage), CABN Investments (a division of NBII) and other affiliated entities. Brokers may receive, depending on the distributed series, a monthly commission representing a percentage of the average daily value of the securities held by their clients.

## Brokerage Fees

The Fund may pay broker’s commissions at market rates to a corporation affiliated with NBII. The brokerage fees paid by the Fund for the period are as follows:

	Period ended December 31, 2023
<b>Total brokerage fees</b>	27,687.21
<b>Brokerage fees paid to National Bank Financial</b>	27,687.21

## Holdings

As at December 31, 2023, National Bank Investments Inc. held 207.22 Fund securities for a value of \$2,119.85, which represented close to 0.0009% of the net asset value of the Fund at that date. Transactions between National Bank Investments Inc. and the Fund were carried out in the normal course of business and at the Fund’s net asset value as at the transaction date.

## Registered Plan Trust Services

NTC receives a fixed amount per registered account for services provided as trustee for registered plans.

## Administrative and Operating Services

The provision of certain services was delegated by the Fund Manager, NBII, to National Bank Trust Inc. (“NBT”), a wholly-owned indirect subsidiary of the Bank. These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

## Management Fees

The Fund pays annual management fees to the Fund manager for its management services. As the Fund invests in underlying funds, the fees and expenses payable in connection with the management of the underlying funds are in addition to those payable by the Fund. However, the Fund manager makes sure that the Fund does not pay any management (or operating) fees that, to a reasonable person, would duplicate a fee payable by the underlying fund for the same service.

The fees are calculated based on a percentage of the Fund’s daily net asset value before applicable taxes and are paid on a monthly basis. Under the *Distribution* heading, expenses include the broker’s compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the *Other* heading, the fees relate mainly to investment management, investment advisory services, general administration and profit. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

Series	Management Fees	Distribution	Others <sup>†</sup>
Advisor Series			
Front-end load	1.65%	60.60%	39.40%
Series F	0.65%	—	100.00%
Series N and Series NR*	0.30%	—	100.00%
Series O	N/A**	—	100.00%

<sup>(†)</sup> Includes all costs related to management, investment advisory services, general administration and profit.

<sup>(\*)</sup> For Series N and NR, offered only to investors using the NBI Private Wealth Management service (“PWM”), management fees only cover management of fund investments, i.e. the fees related to management of fund portfolios constituting the PWM profiles. General administration services, trailer fees and sale commissions paid to brokers are covered by the PWM’s service fees, which are paid directly by investors.

<sup>(\*\*)</sup> The Series O is only available to selected investors that have been approved and have entered into an O Series units account agreement with National Bank Investments Inc. The criteria for approval may include the size of the investment, the expected level of account activity and the investor’s total investments with NBII. No management fees are charged to the Fund with respect to the O Series units. Management fees are negotiated with and paid directly by investors and are in addition to the fixed-rate administration fee. NBII does not pay any commissions or service fees to dealers who sell O Series units. There are no sales charges payable by investors who purchase O Series units.

## Past Performance

The performance of each series of the Fund is presented below and calculated as at December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

## Annual Returns

The bar charts indicate the performance for each the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

<sup>(1)</sup> Returns for the period from June 28, 2021 (commencement of operations) to December 31, 2021.

<sup>(2)</sup> Returns for the period from January 18, 2022 (commencement of operations) to December 31, 2022.

## Annual Compounded Performance

The following table shows the Fund's annual compound returns for each series in existence greater than one year and for each of the periods ended on December 31, 2023, compared with the following benchmark:

- MSCI World Index (CAD)

Net asset value per unit (\$)	10.23	9.08	11.24

<sup>(4)</sup> This information is derived from the Fund's Annual Audited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

<sup>(2)</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

<sup>(3)</sup> Distributions were paid in cash or reinvested in additional units of the Fund, or both.

<sup>(4)</sup> The net assets are calculated in accordance with IFRS.

<sup>(5)</sup> This information is provided as at the last day of the accounting period shown.

<sup>(6)</sup> Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period. The management expense ratio includes, if necessary, the management expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

<sup>(7)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

<sup>(8)</sup> The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

## Summary of Investment Portfolio

As of December 31, 2023

### Portfolio Top Holdings

	% of Net Asset Value
NBI Sustainable Global Equity ETF .....	99.7
Cash, Money Market and Other Net Assets .....	0.3
